

CPCB Battery Waste Management (BWM) Rules 2022

Key Compliance Requirements for Producers, Manufacturers, Refurbishers & Recyclers

1. Legal Foundation – Extended Producer Responsibility (EPR)

- Mandatory registration on CPCB EPR Portal for all Producers (including Importers & Manufacturers).
- Producers are legally responsible for ensuring recycling/refurbishing of batteries introduced in the market.
- EPR compliance is metal-based (Lithium, Lead, Nickel, Cobalt, etc.), not unit-based.
- Failure to comply results in Environmental Compensation (EC).

2. Mandatory Registration Requirements

- Registration through CPCB centralized online portal.
- Submission of GST, PAN, CIN, company and authorized person details.
- Registration certificate required before operations.

3. Sales Data Reporting (Quarterly)

- Mandatory quarterly entry of battery sales data (including self-use).
- Details required: Battery Type, Composition, Brand, Quantity (kg).
- Sales data determines future EPR targets.
- Editing allowed only until 30 June or before annual return filing.

4. EPR Target Generation & Metal Declaration

- Targets auto-calculated as per Schedule II of BWM Rules 2022.
- Producers must declare battery material composition (after 90 days of FY end).
- Metal-wise annual targets are generated (tonnes).

5. Purchase & Management of EPR Credits

- EPR credits must be purchased from registered recyclers.
- Credits are metal-specific and stored in Producer Wallet.
- Certificates valid for 7 years from date of generation.
- Credits can be transferred between registered producers.

6. Annual Return Filing (Deadline: 30 June)

- Mandatory annual filing through CPCB portal.
- Must report waste batteries sent to recyclers or refurbishers.
- Credits must be allocated against each metal-wise target.
- Shortfall carries forward to next FY and may attract EC.

7. Environmental Compensation (EC)

- Levied for non-filing of returns, target shortfall, or audit non-compliance.
- Status categories: Paid, Pending, Overdue, Waived.
- Automatic EC if return not filed before deadline.

8. Responsibilities of Refurbishers & Recyclers

- Must be registered with CPCB.
- Recyclers generate EPR credits based on metal recovery.
- Refurbishers must report used battery intake and processing.
- Only registered entities can participate in credit system.
