Education

Coimbatore Institute of Technology, Coimbatore <i>B.Tech (Artificial Intelligence and Data Science)</i>	<i>Aug 2023 – May 2027</i> <i>8.5/10 CGPA</i>
Shri Vidhyabharathi Educational Institutions, Namakkal <i>HSC, Computer Science)</i>	<i>Aug 2023 – May 2027</i> <i>91/100</i>

Projects

Smart Home Automation System

- Developed an IoT-based smart home system using ESP8266 NodeMCU, relay modules, and PIR motion sensors for automation, security, and energy efficiency.
- Enabled remote control and monitoring via smartphone apps, enhancing accessibility and convenience through personalized automation.

Chat2Docs

- A dynamic web-based chatbot system that allows users to upload PDF documents and interact with them using natural language queries. The chatbot intelligently answers questions by retrieving relevant content from the uploaded PDF using RAG (Retrieval-Augmented Generation) technique.
- **Tech Stack:** Flask, MySQL, Bootstrap, HTML/CSS/JavaScript, FAISS, Hugging Face Transformers, PyMuPDF, Sentence Transformers

Blockchain-Enabled EV Battery Passport with AI

- Developed a blockchain-based Battery Passport system to enable tamper-resistant lifecycle traceability (manufacturing to recycling) using smart contracts deployed on a testnet.
- Implemented an event-driven digital identity model capturing usage, repair, and ownership transfer with immutable audit logs.
- Integrated AI/ML modules for Remaining Useful Life (RUL) prediction and second-life suitability assessment to support data-driven battery valuation and verification.

Internship Experience

Software Development Intern, Yenmin Communications Pvt Ltd	<i>May 2025 – June 2025</i>
◦ Gained hands-on experience in real-world project development and technical implementation. ◦ Assisted in analyzing requirements, supporting system operations, and contributing to team-based solutions to improve performance and efficiency. ◦ Developed practical skills in problem-solving, communication, and applying academic knowledge to industry-level tasks.	

Certifications

◦ Ethical Hacking and Penetration Testing, C-DAC, NOIDA (MeitY)	<i>September 2024</i>
◦ Introduction to Programming in C, Swayam - NPTEL	<i>March 2024</i>
◦ The Joy of Computing Using Python, Swayam - NPTEL	<i>July 2024</i>
◦ Programming in JAVA, Swayam NPTEL	<i>April 2025</i>

Roles and Responsibilities Held

- **Chief Student Co-ordinator**, AI & DS Association, CIT (April 2025 - Present)
- **Student Co-ordinator**, Code-O-Clock'24, Hackathon in Dept of AI DS, CIT (July 2024 - August 2024)

Achievements

- Published article “Hyperautomation” in Pixel magazine, Dept of AI DS,CIT. 2025
- Winner at HackFest - Industry collaborated hackathon with Dsignz media.

Skills

Languages: Python, C, Java

Core Skills: HTML, CSS, JavaScript, ReactJS, MySQL

AI Data Analysis: Machine Learning, Deep Learning, PowerBI

Non-Technical: Teamwork, Time Management, Critical Thinking
